

Backup your file and settings to a folder on your hard drive. Make sure you enough space before you do so.

9. The next screen will present you with a list of programs that you would like to back up. This includes all the programs, and you can back up either the files or settings or both. There is also an option to create a custom list of programs if you want. You can also choose specific folders that you may want to back up.

Choose 'Both files and setting'

10. You will then be presented with a list of programs from which you can choose what programs to back up. You can add the folder, settings, file and file type. If you find it too cumbersome, just use the Wizard.

Programs to be installed in the new computer

11. Now you will be presented with a list of programs you will need to install on your new computer.
