

hard drive. However, if you are using any other option such as a CD or Direct Cable Connection (DCC), you will need to provide that particular path.

6. After doing do, the wizard starts applying these settings, and transfers the files to your computer. It may take some time.
7. Once that is done, you will be prompted to log off. You can either do that or restart the computer. This will let you apply the settings that you just transferred.

Locate the backup folder on the older hard drive
