

3.7.4 Modifying PivotTables

3.7.4.1 The PivotTable Toolbar

If you need to manipulate your PivotTable, you'll find this toolbar useful. Here it is, in all its glory. So what do these functions do? Here's a description.

The PivotTable toolbar has many functions

Name	Function
PivotTable Menu	Lots of menu commands that allow you to take different actions on a PivotTable
Format Report	Displays the AutoFormat dialog box
Chart Wizard	Creates a PivotChart from the PivotTable
Hide detail	Stops detailed information in the PivotTable from being shown
Show details	Shows detailed information in the PivotTable
Refresh External Data	Updates the PivotTable if the information it's based on has changed
Include hidden items in totals	Makes subtotals and totals reflect information in details that have been hidden
Always display items	Specifies that certain PivotTable items should always be displayed
Field settings	Displays the PivotTable Field dialog box for a selected field
Show field list	Displays the PivotTable Field list dialog box
