

save it under a new name each month—it can be very time-consuming to find and update links to the old source workbook. But there's an easy way to do this. First, open the workbook that contains the link(s). On the 'Edit' menu, click 'Links'. In the 'Source' box, click the name of the link with the source you would like to change. Click 'Change Source'. Finally, in the 'Change Source' dialog box, click the source workbook you want to refer to.

Of course, to successfully change source workbooks, the linked data must reside in the same cells in the new source workbook as they did in the old one.

7.4 Outlook 2003

Schedules At A Glance

The Calendar group schedule in Outlook makes it easy to see the combined schedules of a number of people or resources at a glance. You can create and save multiple group schedules, each showing a group of people or resources. To create a group, first click 'Calendar' on the 'Folder List' (or in the Outlook Shortcuts bar). Click Schedules in the 'Advanced' toolbar. In the 'Group Schedules' dialog box, click 'New'. Type a name for the new group schedule, and then click OK. In the dialog box that appears, click the 'Add Others' button, and then click either 'Add from Address Book' or 'Add Public Folder'. Select the names or the public folder, and then click 'Save and Close'.

To view the group calendar, select the group schedule you want to view, and then click 'Open'.

Unknown Sources

Want to keep e-mail messages from people that you don't know out of your Inbox? You can set rules to move messages from unknown sources to a separate folder where you can sort through them at your leisure.

First, create a new folder in your Inbox to hold any mail sent by an unknown source: in the Folder list, right-click Inbox and click
