

that has a 'Stop' and 'Pause' button. You can click the 'Stop' button on this toolbar to stop recording the macro.

After you have finished recording the Macro, you can access **Tools > Macro > Macros**, and choose the Macro name to be run on the document. Click 'OK' and the Macro starts performing the task assigned to it.

In this chapter, we have discussed the features and functionalities of Word at length. Nevertheless, there is still more to Word 2003 than what is mentioned above. However, we cannot cover all that information in this book. This chapter is intended to make you understand and help you come to a certain level of proficiency while using Microsoft Office Word 2003.
