

1.1 Installing Office 2003

1.1.1 Minimum System Requirements For Microsoft Office 2003 Professional

- m Processor: 233 MHz or higher; Pentium III recommended.
- m Operating System: Windows 2000 Service Pack 3 or later, or Windows XP or later.
- m RAM: 64 MB (minimum); 128 MB (recommended)
- m Hard drive space: 450 MB.

Note: Hard disk space usage varies depending on the configuration; Custom installation choices may require more or less hard disk space; selection of the 'Complete' installation choice will require more hard disk space. The above listed requirement is for the default configuration.

- m Additional information on the system requirements for Microsoft Office 2003 Professional and specific items and services can be found at <http://snipurl.com/fjq1>.

1.1.2 The Installation Process

- m Insert the Office 2003 Installation CD into your CD drive. After a few seconds of copying installation files to your computer, the installation will begin. If the installation does not begin automatically, open 'My Computer', then open the OFFICE11 CD, and double-click the SETUPPRO.EXE.
- m You will be prompted for the Office 2003 product key. Type in the product key on the back of the CD. Use only five characters per field box, and ensure that there are a total of 25 characters. When you are finished, click 'Next'.
- m The next screen of the Office 2003 Installer will prompt you for your user name, initials, and organisation. Click 'Next' once this information is entered correctly.
- m The next window displays the End-User License Agreement (EULA). Click the checkbox at the bottom corresponding to 'I accept the terms in the License Agreement'. It is recommended that you go through this once. Then click 'Next'.
