

Format cells as numbers

You can also select from a list of predefined styles to format cells for numbers. To access the style menu, select 'Format' from the menu bar, then select 'Styles' for a list of preformatted options. Click the down arrow beside the 'Style' name (default is 'Normal') for a list of preformatted styles. Use the 'Format Cells' menu above if none of the preformatted styles fit your criteria.

Format cell fonts and effects

Format the alignment of cells

Note that you can create, edit, and delete styles in the 'Style' menu. When you click to 'Modify', 'Add', or 'Delete' a style, you can use the 'Format Cells' menu to select options for numbers, alignment, font, size, colour, or any other available formatting option. When you create a new style, it will be available in the 'Style' menu.
