

Tools And Utilities

As we have seen, there's a lot you can do on the Internet. The question is how to do it safely. There are a number of tools available, both on the Internet and off the shelf that enable us to enhance our browsing experience, for example, download managers and search tools, firewalls and anti-virus software keep our system safe from the nasties out there.

In this section we give you a brief roundup of a few essential tools. Surf's up!
