

they also offer free blog hosting. It works fine and is fully customizable to fit your needs and design (but then you'll have to do some coding). You can integrate it with any site. No doubt, free services pose a problem. You never know how long they will be free, or even available at all. What will happen to your data if they shut down? Considering that our focus is corporate communications it's generally not a good idea to rely on free services, no matter if we're talking about blogging or other services. That leaves you with two more options:

- m Paying for a service like Blogger, e.g. TypePad.
- m Buy a blog publishing system. An example of this is MovableType.

Just don't overdo it. While ordinary web projects always are technical to some degree, blog projects don't have to be. They shouldn't be from the start. If you've never blogged it's much more important to get to know the format. How does it work? How can you use it for business?

Steps to your Business Blog

You do it anyway you want to. But here's a list if you want to make sure that you think about all aspects of blogging before you start.

I could add a #0, though: Just do it. Never mind risks, lack of resources, communications strategies. Never mind what you are supposed to do in the blogosphere. It is a new world, a new communication era. And it seems quite easy to get a new job these days...

I'm not sure that would be totally wrong. A lot of good blogs have started that way. But here's the more traditional approach.

1. Start using RSS for news, jobs or press releases

Well, this you should do even if blogging isn't for you. But if you are going to blog you need to feel comfortable with this form of
