

Since we cannot list all of them in detail, we will cover the most important ones here. You should be able to decipher the rest easily enough by clicking on them.

Preferences

This is where you set all the important settings of your site, such as the name of the site, the logo it uses, the theme or colour of the entire site, and all administrative information and settings. Make sure to set all the correct information here first. You should also check out the different theme options that come bundled with PHP-Nuke and decide on one that suits your site best. You can always tweak the design later, or even download a PHP-Nuke theme from the thousands available online.

Blocks

Blocks are just that—blocks! The different boxes you see around the default site that you already have are its blocks. We have marked

The Administrator Control Panel will let you control everything you see on your site, including which blocks go where...
