

preview all of them in a browser—you can do this by pressing [F12]. The last step is to upload all the pages and images to your Web server. Remember to keep all relative paths exactly the same as they are in your root folder (where ‘index.html’ is saved) on your hard disk.

Use the Insert menu to insert tables in to your Web pages easily

Inserting Objects

In Dreamweaver, you can insert a large variety of objects into the current page. Just click on the ‘Insert’ menu to see the list of available objects. Once done, don’t forget to save your page.
