

- m features detection and removal of more than 150,000 viruses
- m is always among the winners of comparison tests featured in computer journals
- m has a resident Virus Guard that serves to monitor file movements automatically, e.g. downloading of data from the Internet
- m scans and repairs macro viruses
- m protects against Trojans, worms, backdoors, jokes and other harmful programs
- m protects against previously unknown macro viruses, boot record viruses and master boot record viruses

And last but not least.

- m features quality “Made in Germany” (Cool selling point for a car, but an anti-virus?)

Whatever the quirks of the online description of AntiVir, it's still a great program!

If you suspect you're infected, you can find out more about what you're infected with
