

The folder list. One click and all photos in the folder are visible

Like with all things Google, a search bar is mandatory!

The main options bar that lets you fetch photos from external devices as well

Easily identify the folder and also perform tasks using the drop down menu on the right

The Picture Tray where you 'Hold' photos to perform actions on

Print, blog or make collages... easy as pie

The Media Detector that runs in the background adding all photos it finds

The slider bar that lets you decide the size of the thumbnail you are viewing

One-click actions of holding or clearing photos, marking them etc is done here
