

To make navigation even easier, you could assign labels to photographs. This can be done either individually or in batches. When you click on a photo in the preview mode, click ‘Hold’ in the lower panel and this will ‘Hold’ your photo in the tray. To remove them from the tray, just click ‘Clear’. Clicking ‘Clear’ does not delete your photos; it just removes them from the tray. Why is the tray there at all? So you can perform actions on batches of photos.

Speaking of which, let's complete the labelling of photos, shall we? Once you have held any number of photos in the tray, click a

Choose the thumbnail size and you can view them this big...
