

The Keyboard

It's up to you whether you'd like to get yourself a gaming keyboard or stick to other gaming peripherals such as mice and gamepads. If you really want a gaming keyboard, the Saitek PC Gamers' Keyboard fits the bill. If you are looking at a typical keyboard, get the Wireless Optical Desktop Comfort Edition. It's a wireless keyboard and mouse combo with comfort pads—useful in lengthy gaming sessions.

The Mouse

We've already spoken about mice in the gaming peripherals section. You can refer to that section, or, just choose the Logitech MX518 gaming-grade optical mouse. Although this thingy is wired, it still packs a mean punch when it comes to gaming. Retailing at around Rs 5,000, this mouse will definitely not disappoint you.

This more or less finishes our dream gaming rig configuration. Of course, by the time you read this, something new may have caught our fancy, but until then, this is what we're sending dear old Santa as a wish list.
