

i-Mode phones have a special i-Mode button for the user to access the Start menu. There are numerous official sites—and even more unofficial ones—that can be made available by anyone, using HTML and with access to a standard Web server. NTT DoCoMo supervises the content on the official sites and they are often commercial. These official sites are accessed through the menus, but the unofficial site addresses may be typed manually or through the use of OCR functionality with the now ubiquitous mobile-camera. An i-Mode user pays for both sent and received data.

4.4.4 Bluetooth

Bluetooth is an industrial specification for wireless personal area networks (PANs). Bluetooth provides a way to connect and exchange information between devices such as personal digital assistants (PDAs), mobile phones, laptops, PCs, printers and digital cameras via a secure, low-cost, globally available short-range radio frequency.

Bluetooth is a radio standard primarily designed for low power consumption, with a short range and with a low-cost transceiver
