

Bookmarks (Favorites)

Bookmarks provide a permanent and simple way to remember your favourite Web pages.

m **Creating a bookmark:**

Navigate to the Web page you want to mark. Go to the 'Favorites' menu, and click 'Add to Favorites'. Give the page a name or keep its original name, then click 'OK'.

Creating a new bookmark

m **Viewing and using bookmarks:**

Click on the 'Favorites' menu to view the list of bookmarks you have created. From that list, click to select the bookmark of the page you want to see.

- ### m **Organising your bookmarks:**
- Internet Explorer lets you arrange your bookmarks in folders and change the order in which they appear. Open the 'Organize Favorites' window by clicking on the 'Favorites' menu, and then 'Organize Favorites'. This window lets you create folders and place bookmarks in those folders by using the 'Create Folder' and 'Move to Folder' buttons. You can delete and rename existing bookmarks using the 'Delete' and 'Rename' buttons. Dragging bookmarks within the right-hand display window changes the order of their appearance. You may also move them into folders while within the Favorites menu.
