All	NoScript	You have to use Greasemonkey scripts on.	[16] #
	Window title doesn't change when switching tabs	May be fixed when 0.6.3 is released.	[16] #
Prior to 0.3.5	Major security flaw that could allow websites full access to your computer	Upgrade to a newer version	[17] #
Linky	2.6	Gray bar above the status bar with red arrow.	Uninstall Linky.
NoScript			[18] #
	Causes an illegal operation in the Windows Media Player plugin if it is blocking JavaScript on a page with embedded Windows Media	Do not block websites that have embedded Windows Media if you want to be able to play the media	[19] # [20] #
All	FlashBlock requires JavaScript to work to block flash ads	Do not use both FlashBlock and NoScript together (NoScript includes Flash-blocking functionality)	[21] #
	Greasemonkey scripts require JavaScript	Set NoScript to allow JavaScript on sites you wish to use Greasemonkey scripts on.	[22] #
Prior to 1.1.3.9	Causes Firefox to hog memory	Update to 1.1.3.9	[23] #
StumbleUpon	All (?)	Changes Firefox's user-agent string and can make addons.mozilla.org think you have an older version of Firefox installed	Reset general.useragent.vendorSub in about:config
SwitchProxy Tool	All	Causes new Firefox windows to freeze for a few seconds	Disable SwitchProxy's auto-update feature
Tabbrowser Extensions (TBE)	All	General slowdown, conflicts with other extensions, can cause Firefox to not work at all	Uninstall TBE, use Tab Mix or Tab Mix Plus instead
Tabbrowser Preferences (TBP)	All (for Firefox in some languages)	Puts a bar at the bottom of the screen which reads: <button id="catTabbedButton" label="stabprefs.label;"	Uninstall TBP
		Puts a bar at the bottom of the screen which reads:	[27] #

Problematic extensions for Firefox

If an extension you use appears in the list and is known to cause crashing or hanging, update it to the latest version or uninstall it from Firefox until a fix is available.

Solution #3: Update Extensions

Every time a new version of Firefox is released, extensions need to be updated so that they are compatible. However, irrespective of your Firefox version, it is always best to use the most recent release of any extensions that you have installed.

Not all extension updates will be available through Firefox's update system. You may have to find updates for these extensions manually by visiting their homepage and installing the latest version over the top of the current version. You may also find extensions at the following sites:
