

3.4.2 Changing user properties

There may be a GUI application (either bundled or add-on) which can be used to find and change user settings. But the sure-shot way of doing so is via the terminal. Here are some commands for changing various properties of an account:

chfn Change the full name field
chsh Change the login shell
passwd Change the password

```
root@Kailas: /home/kailas
File Edit View Terminal Tabs Help
root@Kailas:/home/kailas# adduser rajeev
Adding user `rajeev'...
Adding new group `rajeev' (1002).
Adding new user `rajeev' (1002) with group `rajeev'.
Creating home directory `/home/rajeev'.
Copying files from `/etc/skel'
Enter new UNIX password:
Retype new UNIX password:
passwd: password updated successfully
Changing the user information for rajeev
Enter the new value, or press ENTER for the default
    Full Name []: Rajeev N.V.
    Room Number []:
    Work Phone []:
    Home Phone []:
    Other []:
Is the information correct? [y/N] y
root@Kailas:/home/kailas#
```

Editing user information. You may need root access to do this
