

Add text as garnishing, and you have a delicious image that your friends will be lapping up and praising. Time taken? Five minutes! Thank you Photoshop, because of you I now have friends!

Well, fun stuff aside, you will also be able to get a lot of serious work done once you've mastered the whole layers thing in Photoshop. Apart from just Opacity and Fill, there are loads of things you can do with layers, all of which will be covered in the chapters that follow.
