

revert the areas you stroke with the History Brush to the last saved image state. If you're someone who saves often (which you should do), and also make many changes in a single step—like painting over half the image in a single step—the History Brush will help you revert small parts of an image to the last saved state.

Let's explain this in more detail by using images (as we should):

Step 1: The original image.

Here you see a fruit bowl with a knife

Step 2: Let's say we added the Glowing Edges filter.

We forgot we didn't want to apply the filter to the knife.
