

10.2.3.1 Making a Dynamic Playlist

Dynamic Playlists make accessing favourites very easy. Creating a Dynamic Playlist is even easier. For the purpose of demonstration, we have used the iTunes Media Library feature.

1. Click **File > New Smart Playlist** or use the keyboard shortcut [Ctrl] + [Alt] + [N].

2. In the menu that pops up select the parameter(s), called 'rules', that you want your Playlist to match. For example, select **Artist-is- <name of artist>**

3. You can add Rules to further modify your Playlist by clicking the '[+]' button

4. You can also specify the number of songs/minutes/hours/ megabytes/ gigabytes you want the Playlist to contain

5. Select the 'Live Updating' option which will add a new file to the Playlist if it matches all the rule

6. Hit 'OK' and voila!

You can select which parameter(s) you want to create your Smart Playlist on the basis of

Winamp's Smart Views also allow multiple parameter selection

Winamp (version 5.0 and above) also allows you to make a Dynamic Playlist. It is called 'Smart View' and can be created by hitting the 'Library' button in the Media Library and clicking 'New Smart View'. Just title your Smart View aptly, select your parameter(s) and hit 'OK'.
