

Remove Pinned Programs

Don't like the pinned program list in the Start Menu? We do—so we don't need to scroll—but some people don't like it. Use this Registry edit to get rid of it.

Navigate to:

HCU\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer

And to:

HLM\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer

Change the DWORD value of **NoStartMenuPinnedList** to **1** to remove the pinned programs list. The default is **0**. The change should happen immediately, but as usual, if it doesn't, just restart!

This will also remove the Internet and E-mail Programs. Also, it only applies to the XP Start Menu and not the Classic Start Menu.

Name	Type	Data
(Default)	REG_SZ	(value not set)
NoStartMenuPinnedList	REG_DWORD	0x00000001 (1)
HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\...		

Restore Folders Upon Startup

Another very useful hack! You can specify whether the folders that were open at the point of the last shutdown should re-open when the system starts up next. You can now reboot in the middle of exploring your computer, safe in the knowledge that all the windows will come back up when you restart.

Navigate to:

HCU\Software\Microsoft\Windows\CurrentVersion\Explorer\Advanced

Change the DWORD value **PersistBrowsers** to **0** to *not* re-open
