

Office Tools

The open source movement today is in full flow and users have never had it better. Not so long ago, the only option that seemed to be available was labeled Microsoft and used to cost a bomb. Things however are changing now all thanks to the Open Source movement. Office suites form one of the largest markets today and we were more than happy to look for alternatives to the ever popular Microsoft Office. We tested some of the more popular applications out and were pleasantly surprised to see how far the Open Source movement has progressed
