Open Sources: Voices from the Open Source Revolution
(First Edition January 1999)

The text of this book has been made available for free online.

A random snippet from the introduction:

'No one outside of Redmond really thinks that it is a good idea for Microsoft to dictate, to the extent they do, what a computer desktop should look like or have on it.

'Industry can have a negative impact on innovation. The Graphical Image Manipulation Program (GIMP) languished incomplete for a year at beta release 0.9. Its creators, two students at Berkeley, had left school to take jobs in industry, and left their innovation behind.'

And here is the full table of contents:

A Brief History of Hackerdom

Twenty Years of Berkeley Unix: From AT&T-Owned to Freely Redistributable

The Internet Engineering Task Force

The GNU Operating System and the Free Software Movement

Future of Cygnus Solutions: An Entrepreneur's Account

Software Engineering

The Linux Edge

Giving It Away: How Red Hat Software Stumbled Across a New Economic Model and Helped Improve an Industry

Diligence, Patience, and Humility

Open Source as a Business Strategy

The Open Source Definition

Hardware, Software, and Infoware

Freeing the Source: The Story of Mozilla

The Revenge of the Hackers

A must-read—at least in parts, if you're even remotely interested in open source!
