

additional copy runs on each client machine.

Installing IOMeter

After downloading the package, uncompress the files, and place the files IOMeter.exe and Dynamo.exe in the same directory. If you want to run Dynamo on multiple machines, Dynamo.exe must be available on each machine (on either a local or networked disk).

In such cases, a properly-configured TCP/IP network must be provided between the systems on which IOMeter and Dynamo are to be run. No network is needed if IOMeter and Dynamo are run on a single system.

Running IOMeter

To run IOMeter, double-click on IOMeter.exe. The GUI appears, and IOMeter starts one copy of Dynamo on the same machine. IOMeter undertakes tests to assess:

1. Disk performance

Configuring IOMeter
