The interface

The layout of ZipGenius has the XP look. There are quite a few options to change the look such as large icons, grid separation, filters, folders split view, and more.

ZipGenius comes with the XP look

The display is very orderly and has been designed in a systematic fashion. The Options area is found in the Tools menu, and gives plenty of options to customise it.

A great feature of ZipGenius is the window showing the statistics of the files you might be working with. The display features pie charts listing the least and most compressed file in the archive, as well as medium compression, folders and required disk space.

ZipGenius places a small icon in the task bar, associates itself with your compression files on your computer, and places menu choices when you right-click in your file manager.

Features

ZipGenius is loaded with lots of great features that make working with compression files a breeze. It comes complete with the "First Step" feature, which can be accessed easily by using the [F1] key. From here you can pick exactly which process you wish to perform, and the Wizard will guide you through the whole process. The entire process is fully explained and the final compression process is really fast.
