

5.4.1 burnatonce

(<http://burnatonce.net>)

BurnAtOnce claims to be the first freeware CD/DVD authoring tool on the Win32 platform. Actually, it's a front-end to various high quality components: cdrdao, ddump, mad (mpeg audio decoder), etc.

BurnAtOnce—first on the block

BurnAtOnce has a slick interface and good basic features. The user can create audio and data discs, read discs to image files, burn image files (.bin/.cue., .iso), and erase CD-RW discs. It can also handle DVD discs, which requires the installing of a free but time-limited third-party software. The software supports multi-session burning, bootable discs, and most prevalent file formats. It comes with an audio file converter for MP3 to Audio CD etc.

It is an interesting project in its early stages of development. Even in its current state, it is a very snappy tool for doing some basic CD-R tasks, and most importantly, it is free.

5.4.2 Burrn

(www.burrrn.net)

Burrrn is a little tool for creating audio CDs with the content from various audio files. The supported formats are wav, mp3, mpc, ogg, aac, mp4, ape, flac, ofr, wv, tta, m3u, pls and fpl playlists and cue sheets. Burrn can read all types of tags from all these formats.

Get ready to burrrn!

Burrrn uses cdrdao.exe for burning. The user needs to
