

Google Scholar

You can find scientific research papers at a lot of places on the Net, but then here's a central place from where you can search for them—Google Scholar (<http://scholar.google.com>). The interface is typical Google, and here's a screenshot of the results for the word “pipelining,” with each part of the results explained in detail.

The screenshot shows the Google Scholar search interface. At the top, the Google Scholar logo is on the left, followed by a search bar containing the word "pipelining" and a "Search" button. To the right of the search bar are links for "Advanced Scholar Search", "Scholar Preferences", and "Scholar Help". Below the search bar, the text "Scholar All articles Recent articles Results 1 - 30 of about 49,700 for pipelining [definition]. (0.23)" is displayed. On the left side, there is a list of authors: M Lam, B Rau, C Healy, T Cho, and V Allan, with a "7" next to it. The main results area shows two entries. The first entry is "Software pipelining: an effective scheduling technique for VLIW machines" by M Lam, with a "1" next to it. Below the title is a link "OT 12 »" and the text "M Lam - Proceedings of the ACM SIGPLAN 1988 conference on ..., 1988 - portal.acm.org". The second entry is "Iterative modulo scheduling: an algorithm for software pipelining loops" by BR Rau, with a "2" next to it. Below the title is a link "Page 1. Iterative Modulo Scheduling: An Algorithm For Software Pipelining B. Ramakrishna Rau Loops Hewlett ... software pipelining innermost loops. ... Cited by 250 - Related Article 3 Web Search 4 BL Direct". The third entry is "A 10 b, 20 Msample/s, 35 mW pipeline A/D converter" by TB Cho, with a "6" next to it. Below the title is a link "group of 3 »" and the text "TB Cho, PR Gray - Solid-State Circuits, IEEE Journal of, 1995 - leeeexplore.ieee.org ... A 10 b, 20 Msample/s, 35 mW Pipeline A/D Converter ... In this paper, a power-optimized implementation of a 10 b CMOS pipeline A/D converter that operates at 3.3 V ... Cited by 170 - Related Articles - Web Search - BL Direct".

1. The Title links to the abstract of the article, or if it is available on the Web, the complete article.
2. “Cited By” identifies other papers that have cited articles in the group of papers. (Groups are mentioned soon.)
3. “Web Search” searches for *information about this work*.
4. The “BL Direct” link takes you to where you can purchase the full text of the article through the British Library.
5. The text in green tells you where the paper or work appeared, and other such information.
6. Under “Group Of,” you can find other articles included in this
