Size: 4800km/
Named in: 1979
Named for: Biblical; Noah's region
This procedure can be performed with other features as well.

❍ Spacecraft:
Like regions, the landing sites of spacecrafts on Mars can also be searched. The method of searching remains the same. The information provided for each spacecraft includes its name, location, launch date, and result of the mission.

❍ Stories:
If you're interested in stories related to particular places, click on the "stories" feature. As of this writing, there are 118 stories.

❍ Mountains, Plains, Canyons, Rigdes, Dunes, and Craters
When you search for these, you'll find articles on each of them with the respective source and date mentioned. More information can be found from the info-cloud, which gives a links to the article related to that mountain with source and date.
If you want to know more about Mars, you can always Google it, or find it on **http://mars.jpl.nasa.gov/**. At the centre of Google
