

BloggerBot is a kind of gateway by which images with captions can be post directly on your Blogger blog. Click BloggerBot in your Friends list, and you'll reach the Blogger home page. So you can log in to your Blogger blog and manage your photos directly!

14.3 In Conclusion

High-resolution photos take time to upload to a Web site or attach with an e-mail. Photo sharing is made easy, fast and exciting with Hello. The photos remain safe as the program uses AES encrypted connection to bridge two users. An easy-to-understand and use interface makes the photo-sharing experience smooth and peaceful.
