

Besides the Radio Service, **smashits.com** also offers movie trailers and a Smashits TV service which is accessible from the main site. Clicking on the Smashits TV link at the top right will launch the video window, and the programs can be watched. Other video content includes clips of Bengali, Tamil, and Telugu movie songs and scenes, and Hindi movie trailers. All these can be accessed through the Video Link at the top row of the site. Videos are categorised by movie title only. WebDVD is a feature that allows the saving of a registered user's favourite movie or songs for easier access.
