

- Caclub India Features tax law information and index of links.
- Corpmen Features Indian statutes.

Most of the links here work—and take you to all kinds of sites. In fact, the only problem we could find with the site we're talking about is that there are too many links, and links to links! But just bookmark this site and you've got almost everything there is to be known about India as a political entity—there's even a link to as intangible a thing as Human Rights in India. (The link works, and is depressing.)
