

To change the appearance, select the Design Tab and view the Gallery of Chart Styles. The other tab groups under the Design Tab are Type, Data, Chart Layout, and Location.

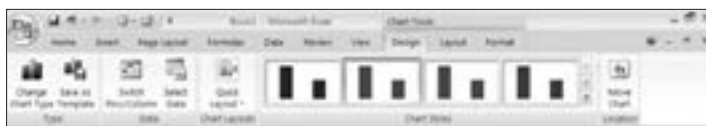

In the Format menu, you will get the tab groups as Current Selection, Shape Styles, WordArt Styles, Arrange, and Size. On the Layout Tab, the tab groups available are Current Selection, Insert (pictures, shapes, and text box), Labels, Axes, Background, Analysis, and Properties.

1. Current Selection

Choose the Format Selection Button in the Current Selection Tab group to customise an element. To reset all the customisations you've made, use the Reset to Match Style option.

2. Shape Styles

Under this tab, you get a variety of options to customise the Shape

The tab groups under the Design Tab of Chart Tools

Tab groups for formatting under the Format Tab

The tab groups for changing the layout, under the Layout Tab

Styles of the Chart Title. You can change the shape styles by clicking on the More button (the little down arrow), change the fill and outline, and select various shape effects.
