

6.5 Data Labels

The Data fed in the worksheet and chart containing labels can be customised. Adding data labels gives a better representation to the chart.

Click on the Chart, then in the Layout tab, click on Labels. Here you will find Chart Titles, Axis titles, Legend, Data Labels and Data Table. Under Data Labels, you can add, customise position, and remove labels. You can also add a data series name, category names, and more.

6.6 Finding Trends In Data

By now you should be comfortable with creating charts and drawing inferences from them. You can now proceed to learn how to find trends/regression from your chart.

Let's suppose you have records of books bought in the last six years (2001-2007), and you want to find some trends. The trend obtained can help you make better decisions in the future when buying books.

Click on the chart, and go to the Layout tab. Under Analysis, click on Trendline and select More Trendline Options. The Format Trendline option box will appear. Here, the
