

The function can be accessed by going to **Insert > WordArt** (on the extreme right). Once there, you can choose from a range of styles that suit your mood. If you're the adventurous type, or you want to tweak your style a little, you can customise it by choosing

The various options available under WordArt

among various options under **Drawing Tools > Format > Shape Styles**, and keep experimenting with all the options there.

Let's try to make the above custom WordArt in 3 easy steps.

Making a custom shape style

- Go to **Insert > WordArt** (at the extreme right) and choose the style that you want from the drop-down list.
- In the new window that appears, enter "Think Digit!"
- Now in **Drawing Tools > Format > Shape Styles**, you can tweak either Shape Fill or Shape Outline or Shape Effects to create a style completely your own... Congratulations! Your skill in using Excel 2007 has increased a notch!
