

8.6 SmartArt

Various SmartArt charts

It is common knowledge that the impact of graphics in spreadsheets increases recall. Yet, in today's age, it is very difficult to create professional-looking corporate charts and diagrams using standard tools. Charting this information makes for a tremendous improvement. However, there are times when you want to represent data in a completely new format. This is where SmartArt graphics are best utilised. Though this is a function we see having great productivity in PowerPoint 2007, it's availability suite-wide and is an added bonus to Excel. All the old charts—organisational, process, and Venn diagrams—have been reborn as SmartArt. Though you can
