

still do charts the traditional way, you can edit ready-made charts using the SmartArt functionality.

What SmartArt essentially does is, it allows you to select pre-defined styles from a variety of charts and allows you to enter contextual text wherever applicable. Text and positioning of shapes get automatically sized based on the style you choose. What's more, you can seamlessly change from various pre-defined styles at a click of a button... Everything reverts to the pre-defined style instantly, without you having to change the font or colour or background.

Charts created using SmartArt can again be formatted with various pre-defined or custom Shape Styles and/or WordArt Styles. Here is a table of other SmartArt accessibility shortcuts.

To do this**Press**

Insert a new SmartArt graphic

[Alt] + [N] + [M]

Open the online Help

[Ctrl] + [Shift] + [F1]

Switch between the Text pane and your SmartArt graphic
