|------------------|------------------------------------------|-----------|
| <b>Chapter 1</b> | <b>The Basics</b>                        | <b>9</b>  |
| 1.1              | Introduction                             | 10        |
| 1.2              | The Changes                              | 10        |
| 1.3              | File Types                               | 16        |
| 1.4              | Using Fluent                             | 17        |
| 1.5              | Working With Excel 2007                  | 25        |
| <b>Chapter 2</b> | <b>Document Appearance</b>               | <b>35</b> |
| 2.1              | Templates                                | 36        |
| 2.2              | Styles                                   | 37        |
| 2.3              | Themes                                   | 40        |
| 2.4              | General Formatting                       | 42        |
| 2.5              | Conditional Formatting                   | 44        |
| <b>Chapter 3</b> | <b>Calculations Made Easier</b>          | <b>49</b> |
| 3.1              | All about cell references                | 50        |
| 3.2              | Defined Names                            | 51        |
| 3.3              | Referring to another Worksheet           | 52        |
| 3.4              | Absolute, Relative, and Mixed References | 53        |
| 3.5              | Referring to another Workbook            | 54        |
| 3.6              | 3D References                            | 56        |
| 3.7              | Excel Tables                             | 57        |
| 3.8              | Creating formulas to calculate values    | 58        |
| 3.9              | Moving, copying, and editing formulas    | 60        |
| 3.10             | Validating data during entry             | 61        |
| 3.11             | Finding and correcting errors            | 64        |
| 3.12             | Tracing a formula                        | 67        |
| <b>Chapter 4</b> | <b>Organising And Interpreting Data</b>  | <b>69</b> |
| 4.1              | Data Tables                              | 70        |
| 4.2              | Sorting and Filtering                    | 73        |
| 4.3              | Organising Data Into Levels              | 77        |
| 4.4              | Summarising Data                         | 79        |
| 4.5              | Using Indexed Data                       | 81        |
