

give you a list of options that will help you decide on what action to take. If you specify Ignore Error, this type of error won't be checked for again till you reset the error checking.

If you have too many formulas or your sheet is very complex, you can gather all your formulas into one place and “watch” them conveniently.

Cell	Formula	Value	Formula Bar
B2	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B3	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B4	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B5	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B6	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B7	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B8	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B9	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B10	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B11	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B12	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B13	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B14	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B15	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B16	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B17	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B18	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B19	=SUM(B2:B100)	1,000	=SUM(B2:B100)
B20	=SUM(B2:B100)	1,000	=SUM(B2:B100)

B100	=SUM(B2:B100)	1,000	=SUM(B2:B100)

By using the Watch window, you can

Watch formulas in one window

keep track of all your formulas in a single window and see the result of any changes without having to scroll through the entire worksheet.

To enable the Watch window, first select all the formulas in your worksheet. Go to the Home tab, and in the Editing group, click Find & Select and go to the “Go to special...” command. A dialog box will pop up, where you select the radio button option “Formula” and leave all the boxes under Formula checked. Click OK. This will select all the formulas in the worksheet.

Next, switch to the Formulas tab and select the Watch Window under Formula Auditing. In the dialog box that pops up, click on the Add Watch... button. All the selected cells will be displayed in a dialog box which you can then confirm by clicking Add. You can, of course, remove any formula which you do not want to watch for changes.

As cells are updated and data is modified, the watch window will display the changes as they happen. You will not need to scroll to different parts of the worksheet to see how your data changes. This can be especially helpful with large spreadsheets as you will be able to see the results and instantly and be alerted to any errors.
