

There are three basic formats to present the PivotTable report in: Compact, Tabular, and Outline. Click on the Report Layout button in the Layout group on the Design Tab to choose which format you want it to be in.

The Compact format minimises the data to show it in one screen as far as possible. The Outline format is the classic PivotTable format, and the Tabular format presents the data in a table format to make it easy to copy it from one sheet to another.

In the PivotTables Styles group you can select pre-formatted colour templates that make it easier and simpler to quickly choose a colour template. Click on the down arrow button to choose from a variety of style and colour combinations. You may choose one you like and then manually change the formatting for any particular elements that you want to have a different look. In the PivotTables Styles Options group, you can further control how the formatting should appear. For example, after selecting your colour template, you can specify that you should have alternate colour bands in rows (Banded Rows). You can further format your PivotTable in the Layout & Formatting tab in the PivotTable Options window under the PivotTable group in the Options tab. Similarly, you get further formatting options under the Field Settings option in the Active Fields group.

You can also use a conditional formatting option to get the

The screenshot shows an Excel PivotTable with the following data:

	Sales	Profit	Units	Average
1	10000	2000	100	100
2	20000	4000	200	200
3	30000	6000	300	300
4	40000	8000	400	400
5	50000	10000	500	500
6	60000	12000	600	600
7	70000	14000	700	700
8	80000	16000	800	800
9	90000	18000	900	900
10	100000	20000	1000	1000

The 'Sales' column is formatted with a color scale from light yellow to dark red, and the 'Profit' column is formatted with a color scale from light green to dark green.
