

events recorded on the computer or events for any one calendar day. Using the monitor you can track how stable your computer is, based on the number of crashes and get information on a large number of factors which affect system stability; the monitor for example also tracks the installs and uninstalls of software. The monitor can run from the Start menu by typing in “perfmon.msc” and pressing [Enter].

10.6.8 Disk Defragmenter

Vista includes a Disk Defragmenter which runs in the background as a low-priority task and defragments your system's hard drive. The tool can also be scheduled to run automatically, and is set up by default to run every Sunday morning at 4 AM. This automated feature is the most important change made to the Defragmenter for Vista. Another
