
Macintosh Computers

“To create a new standard, it takes something that’s not just a little bit different; it takes something that’s really new and really captures people’s imagination—and the Macintosh, of all the machines I’ve ever seen, is the only one that meets that standard.”

-Bill Gates; Chairman, Microsoft.

At a conference on the Macintosh (1984)

These words by the world’s richest man and more importantly the Chairman of Microsoft sum up the standards set by Macintosh computers quite beautifully.
