

Yuntaa takes a bit of getting used to, and we found that certain icons need to be double-clicked—not something we’re used to doing on Web pages. Viewing pictures as a slideshow will keep your hands free for other things. You cannot play your uploaded music and watch a slideshow at the same time, but then maybe we’re asking for too much.

You can share specific files or entire folders with individuals. All you have to do is select a file, click Share and then enter the e-mail address of the person you want to share the file with. The site is in Beta stage, so we hope that the few kinks we found will be ironed out soon. Overall, a very good site for backing up data and sharing pictures securely with close friends.
