

A meeting presenter can review his list of meetings and simply click on the green Play icon to start the relevant meeting.

On the presenter's side, a small agent program will download. This will enable him to decide whether or not to allow Desktop sharing, and at the same time will allow him to chat with participants.

On the participants' side, they either click on the link to be taken to the meeting's start page, or go to the Zoho Meeting home page and enter the meeting key if he has obtained the key by any other means—say an embedded link on a blog or a Web page. Once the meeting status shows that the meeting as started, participants

The screenshot shows the Zoho Meeting web interface. At the top, there's a navigation bar with links like 'Switch To...', 'Live Support', 'Help', 'My Account', 'Forums', and 'Feedback'. Below this is a header with 'Zoho Meeting' and a date/time stamp 'Aug 13, 2007 20:09 EDT'. The main content area has tabs for 'Create Meeting', 'My Meetings', and 'Invited Meetings'. Under 'My Meetings', there's a table titled 'List of all meetings' with columns: Topic, Time, Meeting Key, Role, and Status. Two meetings are listed: 'sunflower meeting' and '8069100000000001'. Both are in 'Not Started' status.

Topic	Time	Meeting Key	Role	Status
sunflower meeting	Aug 13, 2007 19:25	8199 5080 0000 0000 4008 10	Presenter	Not Started
8069100000000001	Aug 21, 2007 00:25	8199 8080 0000 0000 3008 13	Presenter	Not Started

Managing your online meetings

can join by entering their names or e-mail IDs. An ActiveX, Java, or Flash viewer will need to be downloaded to view the shared Desktop of the presenter.

The Zoho Meeting installer

Depending on the controls specified by the presenter, the participants will now be able to view the presenter's desktop, be able to take control or request for control of the presenter's Desktop. In the meeting, text chat can be held with all the participants, which can also be
