[Ctrl] + [Alt] + [Down Arrow] or [Ctrl] + [Down Arrow]	Moves the active paragraph or selected paragraphs down one paragraph

Tip: Select Anything

Let's say you want to change the font of all the headings or all the captions in your document, but they're not all placed consecutively in the document, what do you do? You could select them one-by-one, make the changes individually... or you could just select them all at once. Select the first bit of text, then scroll up/down to the next part you want to select, keep [Ctrl] pressed, and then select again. Repeat as many times as needed. Once done, apply whatever formatting changes you need to.
