

3.1 Getting Started

When you start Impress you will be greeted with a Wizard that will help you create a blank presentation based on the right template. In three easy steps, you can choose how to start your presentation:

Step 1

Choose whether you want to start an Empty presentation, choose a theme based on a template, or open an existing presentation. We're starting with a blank presentation, but you can choose a template design that has the look you desire

Step 2

Select the slide design for your presentation, and whether this presentation will be printed or viewed on a screen. Click Next to continue.
