

flowcharts, where text has to be entered into the boxes, or when you have to label an arrow. To do so, just click inside them and type in your text.

Charts can be illustrated better using arrows and shapes in your slides. Consider the charts below:

You can also drag the AutoShape around the screen using the cursor. If you wish to move the AutoShape only vertically or horizontally on the screen, keep [Shift] pressed while dragging it. To “nudge” the AutoShape (move it ever so slightly), select **Draw > Nudge** in PowerPoint 2003; in PowerPoint 2007, select the shape and move it using the arrow keys while holding down [Ctrl]. If you want to change the AutoShape while keeping its proportions and other formatting, select **Draw > Change AutoShape** in PowerPoint 2003.

Monthly expense in August '07		Monthly expense in September '07	
Name	Cost	Name	Cost
Maid	600	Maid	600
Petrol	300	Petrol	500
Mobile	500	Mobile	2000
Food	700	Food	500
Electricity	300	Electricity	700
Misc.	100	Misc.	400
Total	2500	Total	4700

•Petrol expenditure increased due to rise in fuel cost.
 •Mobile expenditure increased due to outstation calls.
 •Misc. costs need to be controlled.

This chart does not quickly highlight the largest expense of the month

Monthly expense in August '07		Monthly expense in September '07	
Name	Cost	Name	Cost
Maid	600	Maid	600
Petrol	300	Petrol	500
Mobile	500	Mobile	2000
Food	700	Food	500
Electricity	300	Electricity	700
Misc.	100	Misc.	400
Total	2500	Total	4700

•Petrol expenditure increased due to rise in fuel cost.
 •Mobile expenditure increased due to outstation calls.
 •Misc. costs need to be controlled.

Using shapes and arrows, your audience will notice the largest expenditure of the month and the reason for it

In PowerPoint 2007, AutoShapes is called Shapes, and the option is integrated into the Illustrations window in the Insert section of the Ribbon. You can also find it under **Home > Drawing**.
