

its infinite wisdom, released a free download called PowerPoint Viewer, which enables you to view presentations in Slide Show mode. You can download the latest version from <http://tinyurl.com/38py6f>, or find it on this month's DVD.

The PowerPoint Viewer enables you to view all presentations created using PowerPoint 97 and later. It also supports opening password-protected presentations and printing them, but doesn't allow you to edit them. The software is also installed when you open a presentation that has been Packaged for CD.
