

7 Half Circle	Blue	While drawing an arc, this indicates that the clicking on the point at which the cursor is will create a semi-circle
---------------	------	--

2.3.2 Linear Inferences

When the line you're drawing is along a particular axis, another line or a specific direction in space, the SketchUp Inference Engine snaps in place, showing you a ToolTip and sometimes a dotted line that stays with your cursor till you move it away from the particular position. In short, Linear Inference = ToolTip + Dotted Line.

The following table would help to understand Linear Inferences better:

Linear Inference	Colour	What it indicates
1 On Axis	Solid line	Shows that the line you're drawing is aligned to any axis (red, green or blue). The ToolTip, therefore, would be, not just "On Axis" but "On Red Axis", "On Green Axis" or "On Blue Axis". The colour of the line becomes the same as the colour of the corresponding axis.
2 From Point	Dotted Line (red, green or blue)	Indicates linear alignment from a particular point along the directions of the Drawing Axes. This dotted line is drawn in the colour of the corresponding axis.
3 Perpendicular	Magenta	Shows that your cursor is now in position to draw a line that is perpendicular to an edge.
4 Parallel	Magenta	Shows you that the line you intend to draw is parallel to and edge.
5 Tangent at Vertex		When drawing from the endpoint of an Arc Entity, using an Arc Tool
